

Ayra Micro

Ultrasound sanitizing diffuser

Dimensions:
22x12x23H Kg.2,3

Ideal for small spaces such as offices, classrooms, hotel rooms and homes

Sanitizing with silver ion liquid is the most efficient environmental protection. The ionized silver atoms sanitize the air and create a lasting protective barrier on all surfaces without damaging them, which is not nullified by the opening of doors and windows.

The **AYRA MICRO** diffuser, in addition to nebulizing the **XaniAir** liquid, is equipped with UVC light. Ultraviolet light is in turn very effective in killing viruses and bacteria. The combined ventilation and vapor misting system diffuses the effectiveness of the UVC light in the room. **XaniAir** liquid is odorless, colorless and absolutely non-toxic.
