Hybrid S.C.

The Hybrid S.C. SERIES are non-refrigerated vending machines extremely compact dimensions and innovative. It's peculiarity is that lends it self to being installed in any location thanks to the possibility to function through a mechanical action implemented with the simple muscular effort or through a solar panel on board the machine.

It also offers a large number of selections and a large capacity. The products, dispensed laterally, are arranged on shelves equipped with spirals motorized that can be positioned at different heights.

The machine can be fixed to the wall or floor, using a special pedestal.
